

1.2.4 Adding Dates/ Restrictions

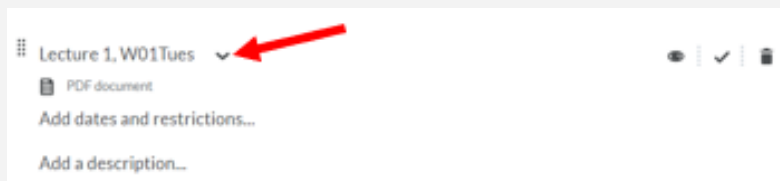

This tutorial covers adding dates/ restrictions onto content. This can be helpful if you want to upload many files at once but delay their release date for students. You can use this tool if you want to plan your course in advance.

STEP 1

You can add dates/restrictions in several places throughout Avenue, most notably in the Content and Assessments tabs. Wherever you see the following you can edit the dates/restrictions.

Add dates and restrictions...

For specific files in the Content tab, you must select the drop down arrow next to the file name and select **Edit Properties in Place**. **Add dates and restrictions** will then appear, select it.

STEP 2

The following appears. Here you can choose dates you would like to alter. Select **Update** when you are finished.

Start Date	Due Date	End Date
Add start date...	Add due date...	Add end date...
Release Conditions		
Create	Browse	
Update	Cancel	

You can also edit release conditions. An example of a release condition is only allowing access to a certain file if a student has completed a specific quiz. Click **Create** under Release Conditions for this.
