Once you are done marking, you can either select **Publish**, which will release the grades to students, or **Save Draft**, if you want to wait to show student grades (i.e. if you want to release everyone's grade at once). Note, you can always go back and edit the rubric after you release it to students.

TIP

If you are releasing all feedback at once, simply use **Save Draft** for each student. On the assignment folder, you will see a button that says **Publish All Feedback**, which you will select once you choose to release grades.
