

2.4.2 Editing Videos in Streams

This tutorial covers how to **trim** videos in Streams. Trimmed portions are permanently removed. Use this to get rid of any lulls in the beginning or end of your video.

STEP 1

Navigate to your videos and pick the video you want to trim. Select the 3 dots and choose **Trim Video**

STEP 2

Drag the sliders to adjust where you want to trim your video. Gray portions are parts that will be cut out. Select **Apply** when done.
