

## 2.7.1 Linking Streams as a Tab in Teams

This tutorial covers how to link a Streams Channel into Teams. Linking a channel into teams is helpful for students as it shows all videos in a central location.

You must create a channel on Microsoft Streams that is linked to your team with your videos before proceeding. View **tutorial 2.4.1**.

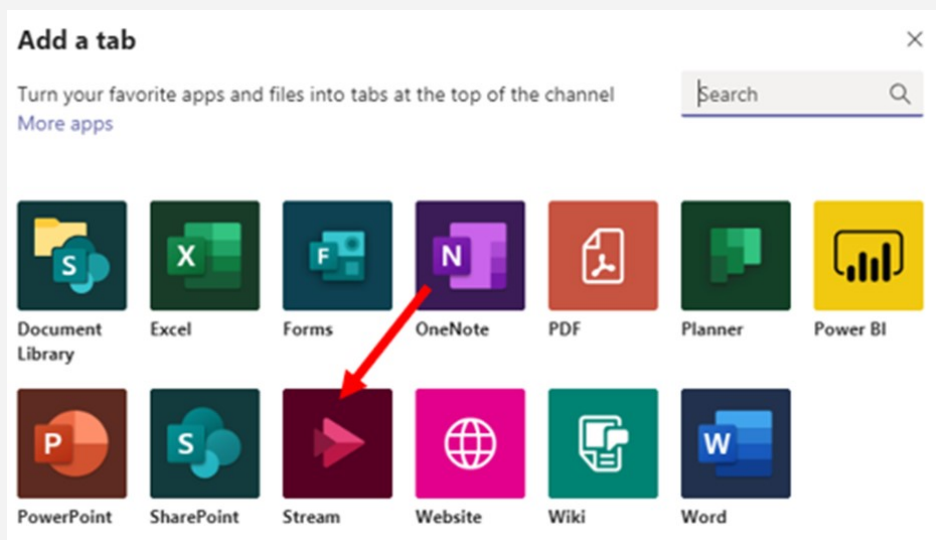

### STEP 1

Open Teams and navigate to the general channel of your class. Select the **Plus** to create a new tab.

### STEP 2

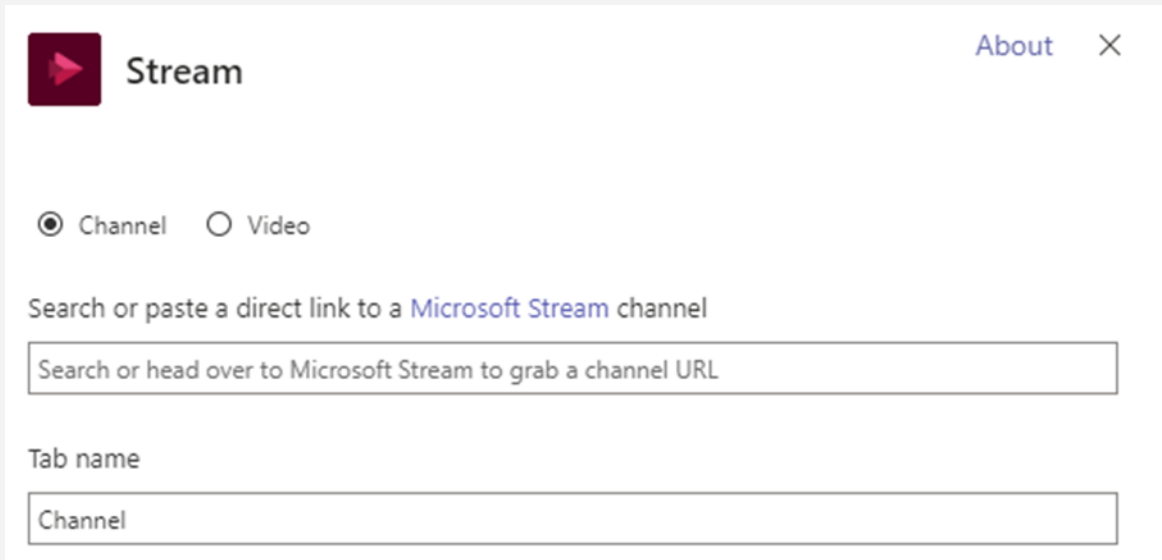

Select **Streams**.

## 2.7.1 Linking Streams as a Tab in Teams

### STEP 3

Search for your channel you created in **Tutorial 2.4.1** and give the new tab a name.

### STEP 4

A new tab is created which will automatically show any videos you add into the channel.
