

3.4.1 Changing Video Permissions

This tutorial covers how to change the permissions of your video to **Unlisted**. It assumes you understand how to access editing features using **Tutorial 3.4**. Videos must be on unlisted to allow students to view them.

STEP 1

Open your video, access the settings by selecting **Actions** —> **Publish**. From the **Publish** feature, select **Unlisted**.

The screenshot shows a video player interface. The video title is "Automated Robot Project" by Anna. Below the video player, there are tabs for "Details", "Share", and "ACTIONS". A red arrow points to the "Publishing Status" section, which is highlighted in a light blue box. The "Publishing Status" section contains three radio button options:

- Private - Media page will be visible to the content owner only.
- Unlisted - Media page will be visible to anyone with a link to the page.
- Published - Media page will be visible to individuals according to entitlements on published destinations

At the bottom of the settings panel, there are "Save" and "Cancel" buttons.
