

## 3.4.3 Editing Captions

This tutorial covers editing captions to be more accurate. It assumes you understand how to access editing features using **Tutorial 3.4**. Editing captions can be extremely helpful for students and is highly recommended.

NOTE: MacVideo will automatically generate captions for videos recorded with Kaltura, if you do not see any captions, wait and then check again. If they still do not appear, access the **Caption & Enrich** feature from **Tutorial 3.4**.

### STEP 1

Open your video, access the settings by selecting **Actions** → **Edit**. From the **Edit** feature, select **Captions** then **Edit Captions**

### STEP 2

Press the **Play Icon** to watch the video. To edit, simply select the text boxes and type in the correct captions. Don't forget to select **Save** when done.
